

Energy Control Unit 8610-1M (Heavy Load)

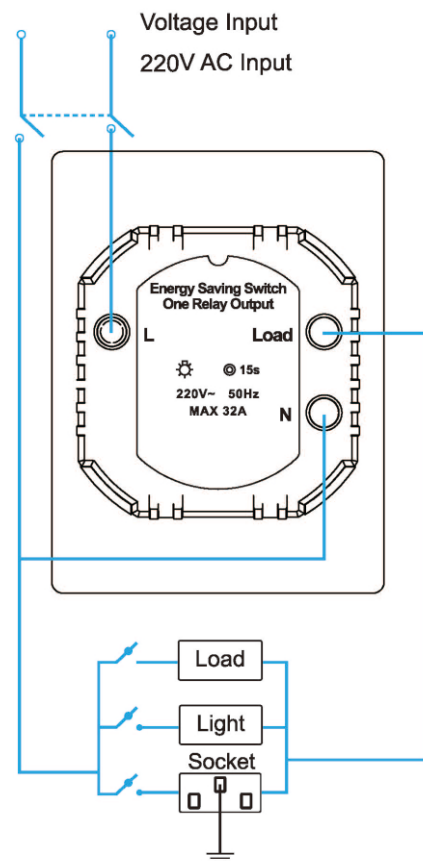

Be-Tech offers a full range of in-room hospitality accessories, and Energy Control Unit is included. This is a perfect solution to provide convenience to your guests and save energy and money when guests are not in the room.

Compatible with the same Be-Tech room keycard, so as to limit the use of air conditioning and other electrical equipments in the room only to the right hotel guest.

Features:

- Heavy load, load current up to 40A.
- Disconnect electrical equipment and air conditioning when guests are outside the room to save energy and money.
- Comfortable timer for guests when removing the keycard from the Energy Control Unit.
- Standard and simple installation.
- Blue color LED for easy location when entering the room.
- Can prevent hotel guests from using certain electrical equipments (Air Conditioning, TV, Phone, etc...) by inserting a name card/credit card while not in the room.
- Only operates with Mifare RFID keycards.
